

Robert Hill

After earning a BS degree in Mechanical engineering from the University of New Orleans in 2001, I began working as a network engineer for a data systems company in Metairie, LA. After about two years I realized that I wanted a career in teaching. After completing the required alternate certification courses at the University of New Orleans, and internships at Ursuline Academy and Truman Middle school, I began working at Edna Karr High School. In 2008 I received a Masters degree in Educational Administration and successfully completed all administrator certification requirements.
